

CASE STUDY

Roofix 20/10

J B SHAKESPEARE LTD FUNERAL DIRECTORS CROYDON

THE PROBLEM

The storage area for caskets and coffins had a leaking flat roof. Many repairs were carried out by professional contractors, but the leaks did not stop. The damage to caskets and coffins along with the ongoing repair costs resulted in thousands of pounds worth of damage.

OBSERVATIONS

The roof had been repaired with many different types of material, including felt, adhesives, bitumen and various roofing compounds. The roof had over 100 cracks and splits that could allow water to penetrate. The repair materials used had been unable to successfully bridge and seal the gaps. Previous roofing compounds had cracked and were obviously not strong or flexible enough to cope with general expansion and contraction of the roof surface.

THE SOLUTION

Cliff Reed was fed up with constant repairs and no solution to the leaks. Cliff contacted FLAG Paints and asked for advice, it was simple use Roofix 20/10! Cliff decides to carry out the repairs himself. The roof was brushed with a sweeping brush and all loose material was removed. The biggest cracks were coated first using a large paint brush, to ensure the best possible coating. A large squeegee was then used to apply the Roofix 20/10 to the main flat area. Roofix 20/10 was also to metalwork, felt, existing roofing compound, stone and wood. The roof area was over 40 sq. metres and the complete job took less than 2 hours. Cliff commented that "it was very easy to apply, and that he was finished much quicker than he expected". The roof was instantly repaired and it has not leaked since.

ROOFIX 20/10

Roofix 20/10 is a single pack elastomeric acrylic based (non bitumastic) compound. Providing excellent flexibility and durability. Containing Draylon fibre reinforcement, already dispersed in the can, making it ready to apply and easy to use. The Draylon fibres ensure a strong flexible web of material and provide the best possible cross-linking strength while remaining flexible in all temperatures. Roofix 20/10 has exceptional adhesion to virtually any roofing material. Specifically developed to provide instant waterproofing for leaking roofs, an all-weather product that can be applied even in the wet. Roofix 20/10 is easy to apply.

The storage area had constant leaks, causing expensive damage to coffins and caskets.

The entire roof was repaired many times (by professionals) but the leaks did not stop!

Shakespeare's do a spot of DIY, and find out just how easy it is to apply. One coat of Roofix 20/10 solves all the leaks.

The roof was entirely waterproofed/finished within 2 hours, providing protection that can last more than 10 years.

SAFETY: Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult Material Safety Data Sheets and follow all local or national safety regulations.
